

**Amendments to the Specification:**

Please replace the paragraph bridging pages 48 and 49 with the following amended paragraph:

Specifically, as shown in FIG. 14, a lighting device in which a liquid crystal device 5512 and a light emitting device 5513 are interposed between a chassis 5511 and a chassis 5514 may be incorporated as a display portion. In FIG. 14, an external input terminal 5515 is attached in the liquid crystal device 5512, and the light emitting device 5513 includes a light emitting element array 5516 using the light emitting element of the ~~invention~~ invention, and a light guide plate 5517. The light emitting element array 5516 includes one or more lines of the light emitting element of the invention. By the light guide plate 5517, light emitted from the light emitting element array 5516 is emitted from an entire surface of the light guide plate 5517, which is on a side facing the liquid crystal device 5512, toward the liquid crystal device 5512.
